FOR IMMEDIATE RELEASE:

POWERFUL, ELEGANT OPTIONS FOR CLEARING THE AIR FROM JENN-AIR

BENTON HARBOR, Mich. (December 1, 2014) – Now available nationwide, the Jenn-Air brand’s expanded ventilation collection offers stylish options for keeping the air clear even when using the powerful, high-BTU cooktops found in many of today’s high end kitchens.

“We’ve been leaders in ventilation since inventing the downdraft cooktop in 1961,” notes Brian Maynard, Jenn-Air marketing director. “Our latest models combine elegant design and powerful ventilation in a variety of configurations, allowing for a range of approaches to designing and equipping a luxury kitchen.”

For those looking to incorporate powerful ventilation into a custom design, Jenn-Air offers a 36-inch hood liner, expandable to 42 or 48 inches. Compatible with a 600 or 1200 CFM motor, the new liner can handle up to 105,000 BTUs and features specially designed baffle filters to effectively capture grease.

The brand’s latest 36-inch perimetric canopy hood models, available in wall and island mount options feature a sleek floating glass design combined with the added efficiency offered by perimetric filtration. Thin slots located on the perimeter of the hood enhance ventilation performance with more concentrated suction. Also joining the collection are new 36-inch wall and 36/42-inch island-mount canopy models showcasing the innovative sound silencing filter system for optimized airflow and improved performance.

All of the new 36-inch wall and island mount models feature a 600 CFM motor that can handle cooking surfaces with outputs of up to 78,000 BTUs. A convenient Auto-On option responds to the cooktop heat by automatically turning the ventilation system on and adjusting power as needed to quickly remove smoke, steam and cooking odors. A Boost function quickly removes smoke from the air by running the ventilation system at its highest setting for 10 minutes before returning the system to its previous setting.

Additional features found on the latest wall and canopy models include welded and polished corners and edges with hidden LED task lighting resulting in modern design that works well in a variety of kitchen styles.

About Jenn-Air:

Since the introduction of the first self-ventilated cooktop in 1961 and downdraft ventilated range in 1965, Jenn-Air brand has consistently grown its reputation as a technology and design innovator. Over the next three years, Jenn-Air brand will continue to expand its offerings with the launch of an unprecedented 150 new products. Its selection of style options includes two distinct stainless steel collections and a cutting-edge Floating Glass finish in black or white. From downdraft cooktops, wall ovens and professional style ranges to dishwashers, refrigerators and such entertaining essentials as warming drawers, built-in ice machines and wine cellars, Jenn-Air brand offers a complete line of major kitchen appliances.
